School, Tenkasi.

SSLC - 80% (2014- 2015)

SKILLS

- Python Programming
- Django Development
- API Development
- React JS
- Backend Development
- RESTful APIs
- Postman
- MongoDB
- PostgreSQL
- Machine Learning
- PHP(Laravel)

CERTIFICATIONS

- Full Stack Web Development with Django - Studygyaan.com
- Python Bootcamp - LetsUpgrade
- Postman API Fundamentals - LetsUpgrade
- MongoDB Bootcamp - LetsUpgrade

PROFESSIONAL EXPERIENCE

Software Developer

EiBS - Elysian Intelligence Business Solution Pvt Ltd Madurai - Tamil Nadu, India | Oct 2024 - Dec 2025

Developed responsive and scalable web applications using HTML, CSS, JavaScript, React.js, and Django REST Framework. Built and maintained robust backends with Django and Laravel (PHP), ensuring secure and optimized API integrations. Designed and optimized relational databases (PostgreSQL, MySQL) to support high-performance applications. Collaborated across teams to deliver end-to-end solutions, improving application scalability, performance, and user experience.

Vinsup Infotech (P) Limited Ayigudi - Tamil Nadu, India | Aug 2023 - July 2024

- Assisted in developing and maintaining web applications using Python, Django, Rest API and PostgreSQL. Collaborated with senior developers to troubleshoot and debug issues. Participated in code reviews and contributed to team discussions.

PROJECTS:

PANCHAYAT (Reactjs, Python, Django, Rest API, PostgreSQL)

The Panchayat Management System digitizes administrative tasks in local governance, enhancing public services, waste collection, property management, and grievance systems. This project creates a centralized platform to improve governance effectiveness and responsiveness in Panchayats.

CONSTRUCTION MANAGEMENT SYSTEM(Python, Django, Rest API, PostgreSQL)

The Construction Management System improves project management, task tracking, and communication in construction projects by organizing resources and maintaining timelines. It enables clients and stakeholders to monitor progress and enhances overall project visibility.

FACILITY MANAGEMENT SYSTEM(Reactjs, Python, Django, Rest API, PostgreSQL)

The FMS streamlines operations by offering tools for managing maintenance tasks, resource allocation, and space utilization. Its goal is to improve efficiency, reduce operational costs, and enhance the experience for occupants and facility staff.

NALAM(Python, Django, Rest API, PostgreSQL)

The Nalam (Milk Delivery Management System) automates and optimizes the milk delivery process, covering order management, delivery scheduling, and inventory control. It addresses challenges in the dairy distribution industry, including order accuracy, delivery tracking, and inventory management.
